Czech Republic	School starts on 1st of September with screening. Children will be tested three times a week via antigen tests and the data will be evaluated. Depending on the incidence of infection, testing will be stopped or continued for another month.		If a child is vaccinated with 2 doses (at least 2 weeks after completion of vaccination at the beginning of school), no testing is needed. Data show, that 31% of children aged 12 to 15 are already vaccinated or plan to get vaccinated soon.		Wearing face masks is mandatory only in common spaces (corridors, ...), but not in classrooms.						School starts on 1 st September.

Table 6: Part 1- School start 2021 in EE

Country	School start in autumn 2021	1. Are you preparing /discussing specific measures /strategies for the start of schools in autumn (Y/N) ?	2. Estonia	<p>Schoolyear in Estonia starts in two days (1st of September). Specific guidelines have been compiled for education and youth work institutions – for different schools, hobby groups, sports facilities etc. https://www.hm.ee/et/koroona - in Estonian https://www.hm.ee/sites/default/files/htm_juhised_koolidele_2021.pdf - in Estonian</p>		EE has different rules for children under 12 and over 12 years old. Over 12 years old are strongly recommended to vaccinate. Mandatory to follow the rules of hand hygiene.	Splitting classes/making smaller groups inside the class is a recommended measure. More groupworks in large rooms. It's also strongly recommended to organize as many activities as possible outdoors.	Face-masks are not mandatory but strongly recommended if a teacher or a student is not vaccinated. If the regional incident rate increases face-masks are recommended in indoors for all people.	No	Unvaccinated workers in education and youth work must be tested for rapid antigen tests once a week. It is not mandatory to take a rapid antigen test if the worker presents a recovery certificate from COVID-19.	Distance learning is a back-up measure.	No		School starts on the 1st of September.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101018317

Malta	<p>There is a high vaccination rate in the age group of 15 years of age. Discussions about reducing measures in younger children are still ongoing. Last school year was quite successful with very little spread in schools. The decision continues with current measures or restrictions to some extent to allow students to learn in the normal way.</p> <p>Schools guidelines used last academic year available at the following link: https://deputyprimeminister.gov.mt/en/health-promotion/covid-19/Documents/mitigation-conditions-and-guidances/Information%20for%20Schools%20re%20the%20management%20of%20children.pdf</p>				Masks in MT are required by law, inside and outside, above the age of 4. Since 1st July, fully vaccinated individuals can not wear their face mask in public. Many Maltese have relinquished this right at this point, ever since the delta spike. The face mask law is very difficult to implement						School starts towards the end of September.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101018317

					with foreigners who come here from several European countries where face mask wearing is much more lenient. At least, they are all vaccinated.

Norway	<p>Norway has already experienced school start on 16th August 2021. The strategy is following: with increasing vaccination coverage in the adult population, infection control measures in society are being eased. This also applies to schools and kindergartens, and at the start of school, most schools and kindergartens can open at a green level in the traffic light model. For school starters, this means that the first day of school can be completed almost as usual, within the current number limits and infection control council.</p> <p>Green level involves the usual organization of classes and everyday school life. Although one can socialize more freely at the green level, there will still be some</p>	Yes, for those mentioned.	Yes, for those mentioned.	No	No	No	No	No	No		<p>Yes, there are occurrence of growing number of outbreaks. Especially municipalities are asking for more measures on the national level. Mass media are regularly updating on the situation.</p> <p>https://www.aftenposten.no/oslo/i/IV431M/uro-i-oslo-skolen-etter-smitteokning</p> <p>https://www.bt.no/nyheter/lokalt/i/86GOv2/slik-er-koronasituasjonen-</p>

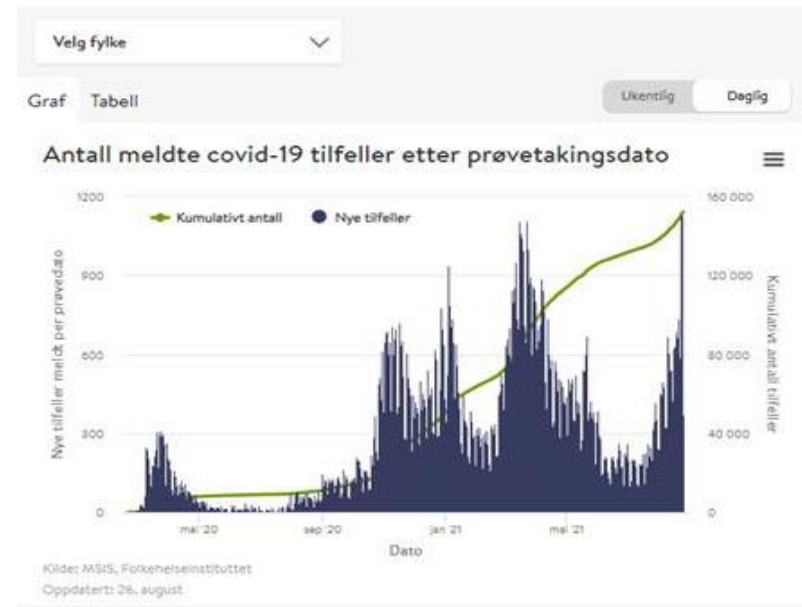

infection control measures that apply to both children and employees in schools and kindergartens. These are the infection control tips that apply:

- Good hand and cough hygiene.
- Avoid handshake and hugging.
- Stay at home for new symptoms and illness, and have a low threshold for testing.

More on this in Norwegian: <https://www.fhi.no/nyheter/2021/skolestart-2021/>

From 16 August, children and young people under the age of 18 can be released from the infection quarantine, if someone in the class, leisure activity or social circle is infected, if they are tested regularly. Household members, girlfriends, and similar close contacts to the infected must remain in quarantine. More on this in Norwegian:

Poland	<p>In Poland school begins on September 1st according to the rules from before the pandemic (regular on-site teaching). The Ministry of Education and Science, Ministry of Health and Chief Sanitary Inspectorate have elaborated guidelines for primary and middle schools regarding the start of the school year.</p> <p>The guidelines are a set of recommendations and instructions whose aim is to provide a safe and hygienic organization of classes in the conditions of the epidemic. In the guidelines it is also underlined that the actions referring to the health safety need to be combined with the care for mental health of children and youth.</p>										In Poland school begins on September 1st

<p>Basic rules included in the guidelines to be observed in schools are:</p> <ul style="list-style-type: none"> - Disinfection - Hygiene - Airing classrooms - Wearing safety masks in common spaces - Social distancing <p>Vaccination is recommended for the school staff and for students in certain age groups (12-17). However, there will not be any separate rules for the vaccinated and non-vaccinated students. In September the vaccination action will be extended to schools (combined with promoting actions addressing children and their parents) depending on the interest expressed.</p> <p>For the time being 1,4 mln children aged 12-17 have been vaccinated (1 or 2 doses, source: https://www.gov.pl/web/szczepimysie/raport-szczepien-przeciwno-covid-19)</p> <p>The percentage of vaccinated children in different age groups (data as of mid-August)</p> <ul style="list-style-type: none"> 17 years - 40% 16 years - 36% 15 years - 32% 14 years - 27% 13 years - 23% 12 years - 12% <p>(Please take into account that children aged 12-15 were included in the vaccination program later, on June 7th 2021).</p> <p>All the above-mentioned information, data and recommendations are subject to change with regard to the development of the epidemic situation.</p>

From 6 years old (Primary School), independently of interpersonal distance or belonging to a stable cohabitation group. It is recommendable for	No	No	No. Face to face learning will be guaranteed for all school levels of the education system. It is necessary to guarantee attendance at least until the age of 14 (2nd year of Secondary Education), given the lower independence at	No	Measures related to hand hygiene, cleaning, disinfection, ventilation, waste management, use of lunchrooms, etc.... are thoroughly	No information, school will begin on 6th Sept.

			<p>interpersonal distance of 1.5 m. In Secondary school and higher levels, students must respect interpersonal distance of 1.5 m, with flexibility to 1.2 m.</p> <p>Further information: Structure of the Education System in Spain https://eacea.ec.europa.eu/national-policies/eurydice/content/organisation-education-system-and-its-structure-79_en</p> <p>It has been authorized the use of vaccines against Covid-19 for adolescents from 12-19 years old since June 2021. Particularly, for those with high risk conditions, high dependency, living in intellectual disability/youth</p>	are as reduced as possible .	<p>pupils between 3 and 5 years old when they use the school transport. In case of outdoor activities where pupils can maintain 1.5 m of distance, they might not use the mask, depending on the epidemiological situation. All teachers must wear a face-mask independently of interpersonal distance maintenance.</p>			<p>those ages; but it is necessary to reinforce face-to-face presence also in higher courses, due to its impact on academic results, emotional well-being and equity. Only with an epidemiological situation classified as of moderate or high concern, the last option would be blended learning (semi-presential education) from 3rd year of Secondary School (15 years old) and above. This option will be used only if it can't achieve neither interpersonal distance of 1.5 m nor outdoor classes.</p>	<p>explained in the guidelines mentioned before.</p>
